

GLOBAL PERSPECTIVE.
UNPARALLELED TECHNOLOGY.
QUALITY FIRST.

SHAPING THE WORLD OF TITANIUM RECYCLING

MEGA METALS INC.

FRONT

GET TO KNOW US

Mega Metals, Inc. is a full-service global industry leader specializing in the recycling of Titanium Turnings and Solids. Established in 1985, Mega Metals recently combined its decades of experience and expertise with the foresight to modernize its approach to the Titanium recycling industry.

In addition to moving all processing under one roof at its facility in Phoenix, AZ, Mega Metals now boasts proprietary state-of-the-art processing systems. Developed through a significant investment and extensive research, these systems deliver Aerospace and Ferro grade Titanium Turnings and Solids. This focused effort on process improvement and innovation enabled Mega Metals to greatly enhance the efficiency of its processes - all while maintaining its commitment to quality and customer satisfaction.

While these cutting edge processing systems put Mega Metals at the forefront of industrial efficiency and increased competitiveness, its financial strength allows it to retain traditional payment terms that are more favorable than today's common industry practices of delayed or partial payments.

TECH SAVVY.
FINANCIALLY STRONG.

EXPERTISE + CAPABILITIES

Our unique and highly efficient systems bring increased performance to our Titanium Turnings, Feedstock and Bulk Weldable processing lines.

We rigorously inspect and test every piece of material that comes through our facility. Our in-house lab features optical emission and X-ray testing.

Our investment in process improvements has yielded excess capacity that enables us to offer tolling of Turnings and Solids for other companies.

We are among a few companies that have attained approvals by Titanium mills for the cleaning and processing of Titanium Turnings, Feedstock and Bulk Weldable used in the production of Titanium ingot. Mill approvals allow us to offer premium pricing on these products.
